Remarks

Claims 20-33 of the application are pending.

Claims 20-33 are subject to an election requirement.

Claims 28-33 have been cancelled without prejudice.

Claims 20-27 are presented herein for further review on the merits.

No new matter has been added.

In the Office Action, the Examiner has issued a restriction requirement indicating that claims 20-33 present three patentably distinct inventions. The first group of claims identified by the Examiner includes claims 20-27, drawn to measuring or testing of a receiver, classified in class 455, subclass 226.1. The second group of claims identified by the Examiner includes claims 28-30, drawn to an antenna with a parasitic element, classified in class 343, subclass 817. The third group of claims identified by the Examiner includes claims 31-33, drawn to measuring and testing or monitoring of a transmitter, classified in class 455, subclass 115.1.

Although Applicants disagrees with the Examiner's contention that there are three patentably distinct inventions, in order to expedite prosecution of this application, Applicants hereby selects group I, namely claims 20-27 for further prosecution on the merits. As such, claims 28-33 have been canceled without prejudice. Applicants reserve the right to continue prosecution on the cancelled claims in divisional applications filed any time prior to the issue of the present application.
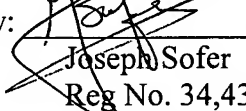

In view of the forgoing, Applicants respectfully submits that now pending claims

20-27 of the present invention are in condition for allowance, the earliest possible notice

of which is earnestly solicited. If the Examiner feels that an interview would facilitate the

prosecution of this Application they are invited to contact the undersigned at the number

listed below.

Respectfully submitted,

SOFER & HAROUN, L.L.P.
